MENT Trader Services for GAIN (MENT TS) is a utility application for automated trading system developers and BlackBox developers. It provides a seamless connection to GAIN Capital for placing and tracking multiple orders from nearly any platform - fast and accurately.

MENT TS easily integrates trading actions into the most popular charting applications, such as...

eSignal
Wealth-Lab
FXCM

TradeStation
MetaTrader
Many Others

Plus, MENT TS integrates into other development languages, such as **C++**, **Delphi**, **VB** and many others. System developers have complete flexibility in developing complex strategy management features and automated trade execution systems.

MENT TS also provides access to special features offered by our broker partners which allows system developers to take advantage of specialized order type placements and strategy management. These special features include special order types, "advisor" order options and specialized ECN options.

MENT TS provides every system developer with all the tools needed to quickly deploy any type of automated trading system. Imagine, being able to integrate automated order processing/tracking in a matter of minutes instead of days or weeks. That is the power of MENT TS - install it, deploy it - you're ready. MENT TS even includes sample code for the eSignal platform and others.

You'll Receive...

- The MENT TS application
- Utility DLLs For GAIN Capital
- Utility DLLs For All Supported Development Languages
- Example Order Execution Code.
- Full Documentation & Examples

All you need is an account with

MENT TS Functions

- "PlaceOrder"
- "Cancel"
- "GetFillAmount"
- "GetFillPrice"
- "GetCurrentPosition"
- "GetStatus"

More will be added as needed.
